PROFILE

Dynamic Full Stack Developer over an year of experience in building user-friendly web applications using HTML, CSS, JavaScript, React, and Node.js. Passionate about leveraging technology to solve problems and enhance user experiences in a collaborative environment. Skilled in both front-end and back-end development, with a focus on creating efficient, scalable, and responsive web solutions.Eager to continue learning and stay updated with emerging technologies to deliver high-quality results.

WORK EXPERIENCE

Full Stack Developer

Kodukku Classifieds Private Limited   2024 - Till Now

- **Websie Development** : Built a comprehensive website for the company using React, enabling other businesses to promote their products and services through the platform
- **Product Listings** : Developed features allowing users to list and sell products such as cars, bikes, and properties directly on the website
- **HRMS Development** : Created a Human Resource Management System 6HRMS) for the company to streamline internal HR processes, including employee management, payroll, and performance tracking
- **Responsive Designs** : Ensured the website was fully responsive, providing a seamless experience across desktops, tablets, and mobile devices

Personal Project

Online Studio Web Application   2024-2024

- **Photo Upload Workflow** : Users can fill out a form and upload their photos along with any specific requests, such as filters and cropping options, before placing an order. Once the order is submitted, employees process and enhance the images in the background based on the customer's preferences. A confirmation email is sent to the customer, ensuring they are notified of the order status.
- **Real-time Chat Support** : Customers can interact with support staff through real-time chat using Socket.IO, providing instant responses to queries. This seamless communication enhances the user experience by offering immediate assistance during their interaction with the platform.
- **Responsive Design with Tailwind CSS & React.js** : Optimized for desktop and mobile, the design ensures a seamless user experience, leveraging Tailwind CSS and React.js for responsive layouts and front-end development. The design also focuses on performance and accessibility across all devices.
